Symmetry™ Optional Modules Version 8
Datasheet

The Symmetry Security Management System software provides a comprehensive range of fully-integrated additional software modules.

This document summarizes the major optional modules. For further information, please refer to the individual data sheets

KEY BENEFITS

- Greater levels of efficiency, flexibility and effectiveness

- Automates and improves site security

- Enables all security management equipment to be controlled from a single user interface

- Reduces training costs

THREAT LEVEL MANAGER™

- Enables the level of security to be easily changed to match the level of threat

- Supports five fully-customizable threat levels

- Selective access control, depending on the threat level

- Compatible with government threat-level security policies

WORKFLOW DESIGNER

- Fully customize the alarm acknowledgement process

- Unlimited number of workflows per Symmetry system

- Create simple question and answer guides with actions based on responses

- Automate sending of commands

- Alarm priority updates

INTRUSION MANAGEMENT

- Provides integration with DMP, HISEC*, Honeywell Galaxy*, DSC® and Siemens* intrusion alarm panels

- M2150 Controller provides complete intrusion management for SCIF applications (*U.S.A market only.*)

- Alarms detected by the panels are displayed in the Symmetry Security Management System Software

- Enables complete alarms monitoring from a common user interface

- Two-way communication allows Symmetry to control alarm panels

- Trigger commands give automatic control of external equipment when an alarm occurs

Europe, Middle East & Africa only

DATA CONNECT (IMPORT/EXPORT)

- Enables identity data to be imported/exported from/to third-party databases (e.g., human resources or ERP)

- Allows import/export from/to text or SQL database

- Encryption prevents unauthorized imports

- Selectable card data for export

- Automatically add access rights during import

- Provides a simple method to receive alarm and event transactions from third party systems

- Real time or batch import

GUARD PATROL MANAGEMENT

- Enables each guard's patrol tour to be monitored, recorded and reviewed

- Confirms that guards are patrolling correctly

- Determines the sequence of tour points and the time allowed for the guard to travel between them

- Indicates deviations from tour rules

- Standard access-control readers or monitor points can be used as tour points

SYMMETRYWEB™

- Remotely access the Symmetry to perform key functions such as Access Control management, visitor authorization and alarm management via a web interface

- Set up new card holders, assign access rights to card readers and doors and register visitors

- Removes the need to install or maintain local thick client software, while still providing access to data

- Interface with Symmetry using a standard web browser from a desktop workstation or mobile device

WEB ACCESS

- Fully-integrated web browser solution using Citrix or Windows Terminal Services

- Provides an easy yet secure method for a user to monitor, control and administer a system from almost any location in the world

- 128-bit Secure Socket Layer (SSL) encryption available

- Enables tasks such as card administration or report generation to be carried out remotely over the Internet or Intranet

- Web Clients require no client installation CD or software protection key

- Security maintained by user login

INTERCOM MANAGEMENT

- Provides an easy-to-use graphical interface for managing and answering calls

- Dedicated Intercom Control screen displays all calls

- Fully integrated with Access Control and Video Management

- A Command button allows a barrier or door associated with the selected intercom to be opened

SAFETY ROLL CALL (MUSTER)

- Produces a report of people, including visitors, who may be in the building and where they are

- Allows multiple muster areas with individual operation

- Invaluable during fire or other emergencies

- New reports are continually generated until no one is left in the building

- Card readers can be used at muster stations to identify employees

- The muster can start automatically when a monitor point is triggered

XML OPEN INTEGRATION

- Allows systems to exchange data with the Symmetry Security Management System using industry-standard XML and Web Services technologies

- Simplifies the task of linking diverse systems with Symmetry

- Alarms from other systems can be exported to Symmetry for centralized alarm management

- Enables an external system to send commands to Symmetry to control card readers, etc.

- Allows card holder information to be imported and exported

ACTIVE DIRECTORY SINGLE SIGN-ON

- Allows authentication with Microsoft Active Directory. Symmetry used to bypass the normal login and password screen
