

AMAG Certifications and Compliance

AMAG is committed to ensuring the highest levels of compliance across the many standards that govern AMAG product development, manufacturing, and third-party products.

AMAG works with customers and suppliers to comply with industry standards. We strive to reduce the amount of hazardous substances in our products. AMAG complies with the following certifications and standards to meet the highest requirements for quality, safety, and environmental protection.

RoHS

AMAG products are RoHS compliant.

RoHS compliance indicates that the presence of any of the restricted substances does not exceed the maximum stated concentration per homogeneous material as defined by the China Directive and EU RoHS Directive 2011/65/EU and the Directive (EU) 2015/863 Amendment as well as UK Regulation, *The Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012* (amended 1 January 2021).

REACH

REACH (Registration, Evaluation, Authorization and Restriction of Chemical substances) is the European Community Regulation on chemicals and their safe use (EC 1907/2006), enacted on July 1, 2017.

The REACH Regulation identifies Substances of Very High Concern (SVHC) that must not be used, manufactured, or imported without the prior authorization of regulatory bodies. AMAG products are designed and manufactured to comply with REACH regulations.

AMAG works with third-party suppliers to ensure that imported products do not contain hazardous materials and keep a register of supplier's compliance statements

EU REACH Annex XVII Article 67

REACH Annex XVII, Article 67 identifies restrictions on certain substances that might be present in electrical and electronic equipment. These substance restrictions also apply to distributors who resell components and sub-assemblies, and retailers who resell finished equipment. To the best of AMAG's knowledge, none of AMAG's products contain any substance subject to Annex XVII restrictions.
