Video Badging and Visitor Management software as standard

Card numbers are optional, allowing cardholder records to be created without a credential

Seamlessly integrated Video Management Solution using CompleteView VMS

Employs intuitive user interface design

Comprehensive alarm-handling features

Product Overview

The Symmetry Professional Security Management software is designed to provide powerful access control and integrated security management solutions for most business applications.

Symmetry Professional is used to actively manage the system and holds the details of each authorized individual with access into a specific building. The powerful, yet user-friendly Symmetry Professional interface enables users to issue access control cards and determine access rights by day of the week and time of day.

Symmetry Professional also includes alarm management software, graphical maps, reports, video and visitor management system and many other powerful features. In addition, a badge designer tool is included providing users with the ability to design and print identity badges.

Symmetry Professional is for small to medium organizations requiring an access control and security management system that can use existing corporate networks.

New with V10, the system health dashboard provides real-time insight into system status and device performance. Gain real-time visibility into panels, readers, disk usage and server status. Tailor your dashboard, accelerate troubleshooting and stay ahead of disruptions.

V10 enables Symmetry Wallet Mobile credentials stored in Apple Wallet (iOS) Google Wallet (Android) via smartphones. V10 supports these credentials through Symmetry Blue and HID Signo readers. Symmetry Wallet simplifies issuing enhanced security and streamline administration.

Customizing the system to show only those features that your users require ensures that operator training is kept to a minimum and improves security. The ability to customize the system in many other ways underlines the inherent flexibility of its design and ensures that the system performs to your exact requirements without compromising ease of use.

Optional Software Modules

Software packages offer a range of fully-integrated additional features designed to enhance the system and provide higher levels of flexibility and integration. Optional features include:

Data Connect Import/Export

Guard Patrol Management

Intercom Management

Intrusion Management

Muster Management (Safety Roll Call)

Threat Level Manager

Workflow Designer

XML Open Integration Module

Wireless Locks
